Purpose

In accordance with the Institute of Internal Auditors *International Standards for the Professional Practice of Internal Auditing (Standards)*, the Chief Auditor is required to establish a follow-up process to monitor audit findings and to ensure management actions have been effectively implemented or that senior management has accepted the risk of not taking action.

Policy

The policy provides a system to track corrective actions or acceptance of risk taken by management on reported audit issues and to convey these actions to Executive management and to the Finance Committee in keeping with the Board of Administration's fiduciary oversight responsibilities.

Management has a responsibility to promptly evaluate reported audit findings, determine appropriate actions to best resolve outstanding items reported, and assure completion of the actions within an established timeframe. The resolutions process is the follow-up phase of the audit to ensure that management actions have been effectively implemented or that senior management has accepted the risk of not taking action.
